

ENITS Mobile Instructions

On-Boarding Instructions for Android and iOS platforms

In conjunction with our technical partner- Client Outlook- the ENITS program team is pleased to announce ENITS is now available for **iOS (Apple)** and **Android (Google)** mobile devices. Both platforms are available from the respective on-line store.

The balance of this document provides instructions on the process to access the images in ENITS test.

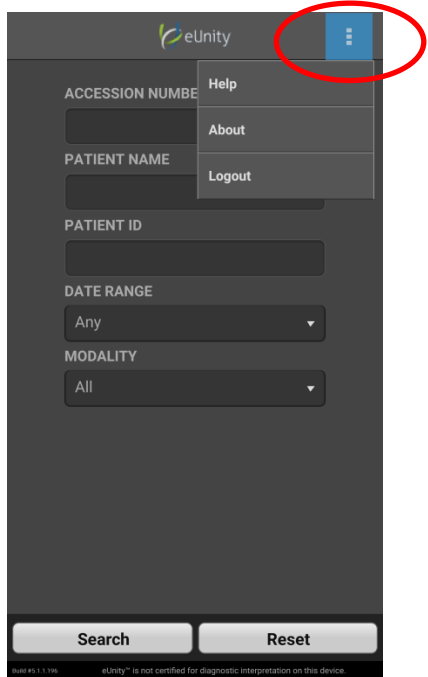

1. Logging into ENITS Mobile

Your **existing ENITS username and existing password** must be used to access either ENITS mobile application. You are still required to answer **one (1)** challenge question.

2. Instructions to access the respective application are presented in the following order:

1. Android
2. Apple

3. Help Files and Mobile features- files are located inside the application under the Help tab (top right hand corner of the main screen). These files will open in a new browser window.

iOS and Android Specifications

Operating Systems: Android 6+ and iOS 10+

For iOS - RECOMMENDED: iPad Air, iPhone 6+

For Android: Mobile devices that run Android OS 6.0 and up

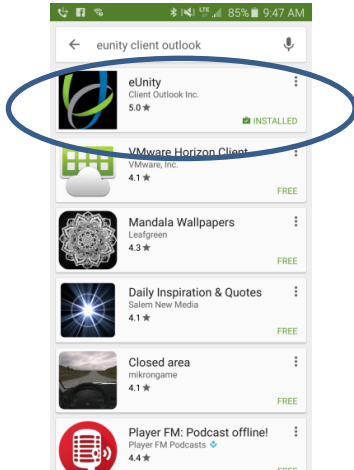

ENITS Mobile Instructions

1. Loading eUnity on an Android device

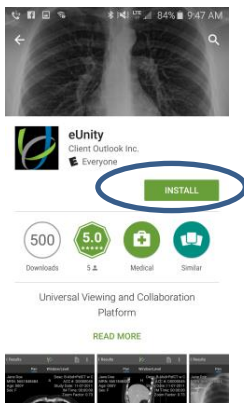

These instructions are specific to the eUnity application available from the Google Play Store.

Step 1: Search for eUnity on the Play Store

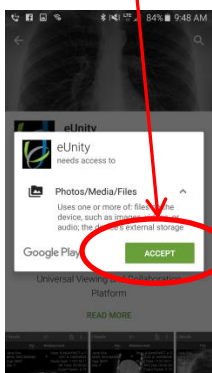

Search using “eUnity Client Outlook” to refine the result

Step 2: Select the eUnity application and install

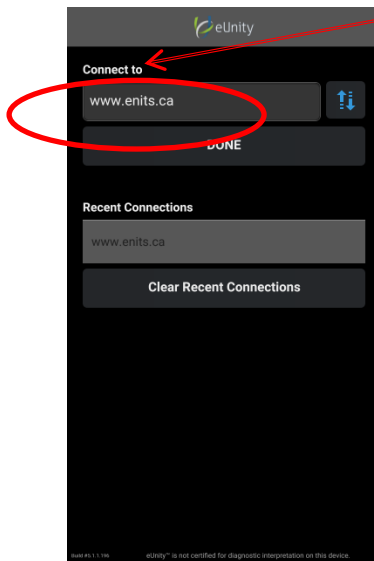

Step 3: Accept eUnity's request to access photos/ media and files.

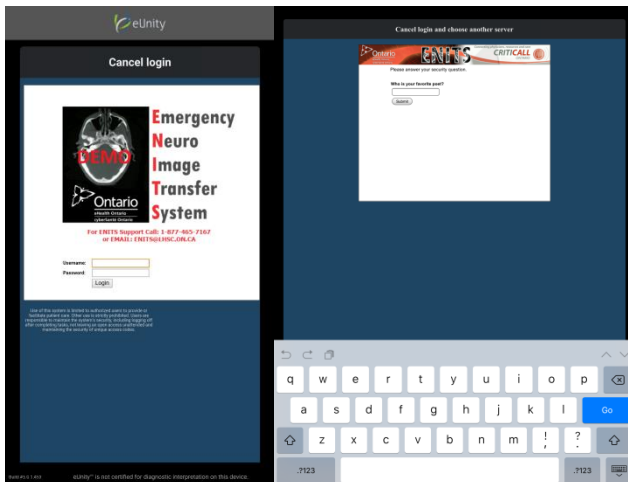

ENITS Mobile Instructions

Step 4: Once the application is installed and opened, you will be prompted to [Connect to](#) one of the domains. In this field enter: www.enits.ca

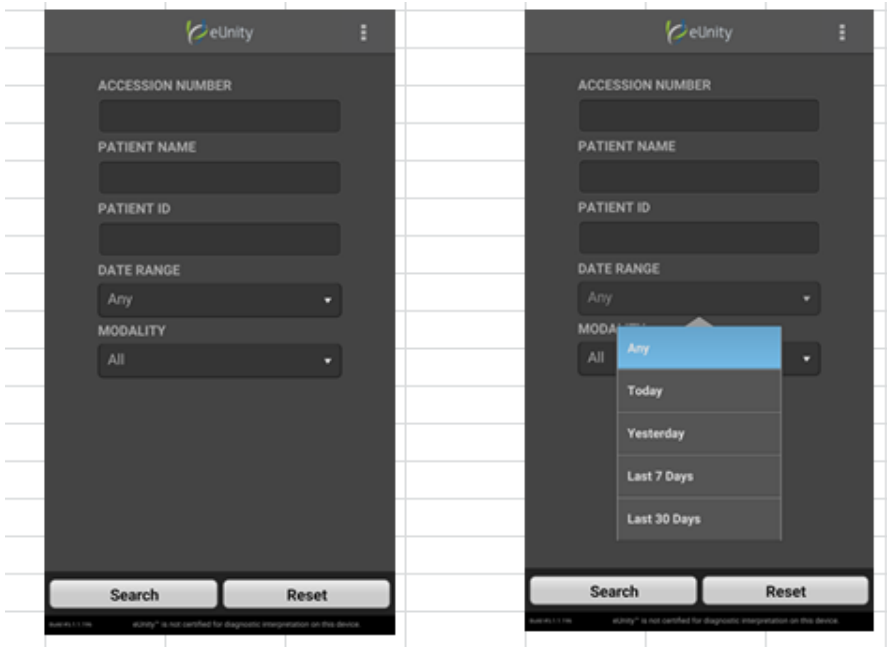

Step 5: Once inside the application, you will be required to authenticate using your [existing](#) ENITS account credentials.

ENITS Mobile Instructions

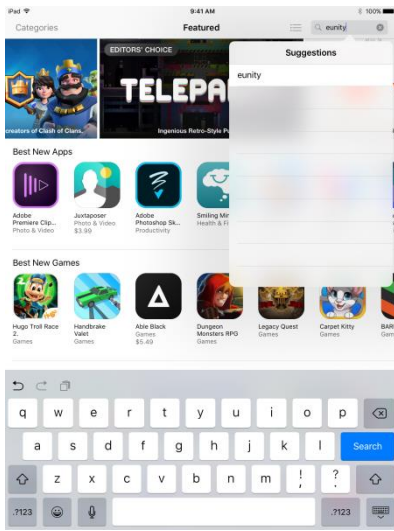

Step 6: The search screen is exactly the same as exists via your desktop/ lap top. Fuzzy name searches are possible. Date range searches are unchanged.

2. Loading eUnity on an Apple device

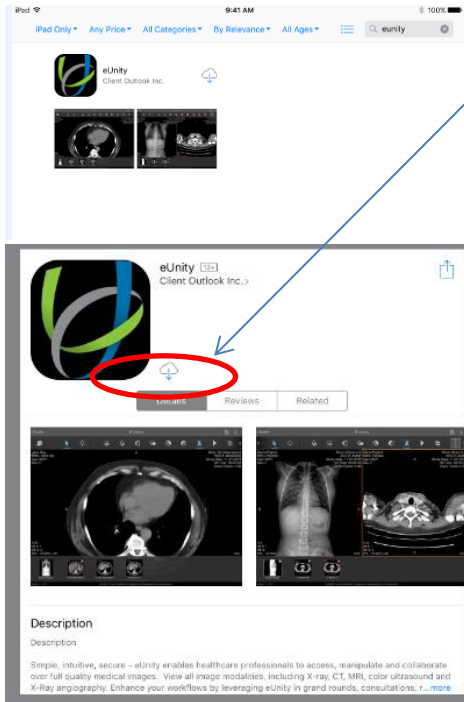

These instructions are specific to the eUnity application available from the iTunes Store.

Step 1: Search for eUnity on the iTunes Store

ENITS Mobile Instructions

Step 2: Select the eUnity application and download and/ or install

Repeat [Steps 4- 6](#) as detailed for the **Android** application to access the test images
